Designed for school and library use, these wonderful 16 volumes of "Britannica Illustrated Science Library" cover important educational subjects such as maths, science, geography, history, social studies and much more. The new "Illustrated Science Library" is designed to help school children aged 10-14 gain a confident understanding of earth, life and physical science. This exciting new reference set is ideal for the classroom, homework assignments or purely for browsing and will engage young learners with an unrivalled extent of material across core science subjects.

Clearly organised, the set is divided into topic areas and includes a glossary of terms and index which will enable children to develop important reference and research skills.

The Illustrated Library: establishes a confident understanding of science; develops research and reference skills; provides answers for curious minds; is a single source for a wide range of topics across the curriculum; and, offers immediate engagement through vivid illustrations.

Earth's Changing Environment

- ? An up to date look at the Environment
- ? Give your students, librarians and teachers accurate and reliable information on climate change with Earth's Changing Environment.
- ? Written for ages 10 to 17, this comprehensive look at the environment focusing on climate, greenhouse effect, global warming and the Kyoto Protocol, whilst exploring the delicate web of life with articles on ecology, biogeography, biodiversity, endangered species, deforestation, desertification.
- ? This up to date volume also addresses the effects of environmental pollution and the efforts to protect the environment and to conserve its resources.
- ? Single hardback volume, 128 pages.

New Views of the Solar System

- ? An up to date look at the Solar System
- ? When the *International Astronomical Union* recently redefined the term "planet", Pluto was stripped of its designation as the solar system's ninth planet.
- ? *New Views of the Solar System* looks at scientists' changing perspectives on the solar system, with articles on Pluto, the eight chief planets, and dwarf planets.
- ? Brilliant photos and drawings showcase the planets, asteroids, comets, and more, providing a stunning collection of vivid and detailed images of the solar system.
- ? Single Hardback Volume, 112 pages.
