

Microsoft School Agreement V3.4

Microsoft School Agreement is a comprehensive, **annual licensing programme** specifically created to address the unique needs of **primary and secondary schools**. Through a flexible and simple format, it allows you to choose which Microsoft products you wish to deploy on your PCs and Servers, making it easier for you to licence and distribute software with **significant cost savings**.

- **Pay one annual fee**
- **Get the best value from your IT budget**
- **Run current versions of software**
- **Stay legal, ensure all PCs are compliant**
- **Licence students**

How it works

To qualify for the School Agreement you must reach a **minimum level of 50 units**. The Agreement is based on counting the total number of eligible PCs in your primary school, secondary school or LEA and then multiplying that by the number of products you wish to use on these PCs - this figure is your **unit count**. Each product has a separate price and this is multiplied by the number of PCs to reach the cost for one year or multiplied by three for the three year agreement option. One or more schools can also order together to reach Level B pricing. All Teachers can benefit from **Work at Home** rights to all software licensed by the agreement, for work related purposes, free of charge (also covers pupils using institution owned laptops). There are two pricing levels:

- **Level A = Minimum 50 units up to 2499 PCs**
- **Level B = 2500+ PCs**

Schools can also licence **students** providing they have a School Agreement in place. The minimum unit count for eligibility is 100, and schools can choose to licence a specific number of students or the entire population (this is a chargeable option). Full details available on request.

Eligible PCs include 100% of all Pentium II, iMac G3, or equivalent or better PCs. In addition you have the option to include any number of older PCs. So, eligible machines are calculated as follows (*enter number of machines*):

- 100% of all Pentium IIs and above**
- 100% of all iMAC G3s and above**
- Any number of lower spec PCs you wish to include**

At the end of the agreement you can choose one of the following options:

- **Renew the Agreement**
- **Exit School Agreement – upgrade to perpetual licence via the “buy out” option**
- **Exit School Agreement – remove software**
- **Exit School Agreement – buy software under alternative licensing program**

Term of agreement

Two terms are available: **One Year Term** or **Three Year Term**. Three year term customers need to restate their PC count at each anniversary date, at which time new products can also be added; **prices are protected** for the three year term for all products licensed in the first year. Products can be added mid-term, but the full year price will be due, and existing agreement dates will apply.

What can be included in the agreement?

There is an extensive range of **Microsoft Desktop Software** and **Microsoft Server Products** which can all be licensed under the Microsoft School Agreement. For the purposes of the Unit Count, all Desktop Software Licences are valued at 1 Unit each, and Server Products all have different Unit values.

Please see overleaf for list of the current **Microsoft Desktop Software** and **Microsoft Server Products** available, together with the Unit values for the Server Product licences. If you cannot find the product of interest listed, please contact us and we will check on availability.

Microsoft School Agreement V3.4 Product List

MICROSOFT DESKTOP SOFTWARE - (1 Unit per Licence)

(e.g. 50 eligible PCs x Office Pro @ 1 Unit each = 50 Units)

For a quotation - please tick products to be licensed
