

For the attention of the Librarian &/or
the Head of Science

Science Resource Center is an in-depth, curriculum-oriented science database that provides a one-stop resource for all science-related research needs

This resource reflects curriculum trends and focuses on key concepts taught in school classrooms including biology, chemistry, physics, earth science, maths, environmental science, life science, medicine, space science, computer science, technology, history of science, science and society, science-related biographies and more.

COMPREHENSIVE COVERAGE

- ? Three core reference titles, offering in-depth topic overviews from all science disciplines
- ? 40+ reference titles offering subject specific topic overviews, biographies, science experiments and more
- ? 150 full-text science magazines and journals, offering the most up to date coverage
- ? More than 8,000 multimedia records, including pictures, illustrations, audio clips and video clips
- ? Links to 500 Web sites, all chosen for their authoritative content

WHAT WILL STUDENTS FIND?

- ? An authoritative Dictionary and a science glossary defining difficult terms and concepts
- ? Multiple search options, including Person, Journal and Advanced searches
- ? Tabbed results lists organizing articles by content type: reference, magazines, academic journals, newspapers, multimedia and Web sites
- ? Content Level indicators to help students choose articles that meet their individual needs
- ? Spotlight articles highlighting topics of high interest to students
- ? A toolbox containing search tips, research guides and science-related items such as important formulas and the periodic table

A POWERFUL ENGINE

Science Resource Center's state-of-the-art searches are powered by InfoTrac,[®] Thomson Gale's search engine.

Its intuitive interface allows students to access a variety of searches without the learning curve necessary when searching multiple electronic sources.

Results are returned by document type, allowing students to focus on the information presented rather than typical Web-generated hit lists.

An InfoMark[®] icon on your results page means you can bookmark the page for future reference, copy it into an e-mail message or embed it into a Web page.

As you can bookmark at the "search" level, a particular search can be updated daily — ideal for researching current events.

InfoMarks are also useful for creating reading lists, course reserves, links to periodical or newspaper sources, lesson plans and much more
